

ACCADEMIA NAZIONALE DEI LINCEI e FONDAZIONE «GUIDO DONEGANI»

INTERNATIONAL WORKSHOP

PLASTICS & CIRCULAR ECONOMY

8-9 April 2021

I lavori si svolgeranno in videoconferenza e saranno trasmessi in streaming

Organizing Committee: Finizia AURIEMMA (Università di Napoli), Sergio CARRÀ (Linceo, Politecnico di Milano), Mario CERIBELLI (Federchimica-PlasticsEurope Italia, Milano), Giancarlo GALLI (AIM e Università di Pisa), Gaetano GUERRA (Chair, Linceo, Università di Salerno), Stefano Valdo MEILLE (Politecnico di Milano), Alberto QUADRIO CURZIO (Linceo, Università Cattolica del Sacro Cuore, Milano), Giorgio QUAGLIOLO (CoRePla, Milano), Giovanni SEMINARA (Linceo, Università di Genova)

PROGRAMME

The idea to organize a polymer-day at Accademia dei Lincei in Rome, comes across the need to honor the memory of Giulio Natta, Piero Pino and Paolo Corradini for the groundbreaking nature of their contribution to Polymer Science. Starting from the invaluable discovery of Ziegler-Natta catalysts and the fundamental intuitions in polymer physics, crystallography and polymerization catalysis, they have inspired in the following 70 years from the discovery paramount innovation involving disciplines spread across industry and academia, which have converged almost immediately to mass production of plastics, while completely revolutionising consumerism in the contemporary and successive generations.

Synthetic polymers are, indeed, extremely versatile materials, with properties encompassing high corrosion resistance, tailored mechanical strength, light weight duty coupled with transparency, low toxicity and high durability. They are used by almost every industry world-wide, including food packaging, medical-tools, space exploration and many others.

The massive production and consumption of plastics today while offering several benefits, represents also one of the greatest environmental problems in the world. Marine litter and microplastics are a source of particular concern nowadays.

This event joining scientists from Accademia and Industry is aimed to highlight the huge progress achieved in Polymer Science, on one hand, and on the other hand to draw attention to the environmental problems generated by misconceptions related to plastic usage, poor end-of-life waste management, incorrect waste disposal rules, insufficient information related to their effective toxicity, degradation chemistry and physics.

The workshop will be also a follow-on meeting of the launch event of the expert group report of EASAC (European Academies Science Advisory Council) on Plastics & Circular Economy, which will be held in Brussels on January 2020.

Thursday, 8 April

9.30 Welcome address, Accademia Nazionale dei Lincei

9.45 Introduction by the Organizers

First session: Journey in Polymer Science

Chair: Finizia AURIEMMA, Giovanni SEMINARA (Linceo)

10.00 Vincenzo BUSICO (Università di Napoli Federico II): *The impact of polyolefin industry in a dynamic scenario*

10.25 Giuseppe SUARIA (ISMAR-CNR, La Spezia): *Research on the plastic marine litter: occurrence and distribution in the marine environment*

Chair: Alberto QUADRIO CURZIO

10.50 Francesca GARAVENTA (CNR-IAS, Genova): *Research on the plastic marine litter: effects on the marine ecosystem and cleaning technologies.*

11.15 Miriam WEBER (Hydra Marine Sciences, Bühl): *Biodegradability of plastics in the open environment*

11.40 Discussion

11.55 Ricordo di Giuseppe Allegra e Lido Porri

Introduce Sergio CARRÀ (Linco, Politecnico di Milano) ed intervengono Stefano Valdo MEILLE (Politecnico di Milano), Giovanni RICCI (SCITEC-CNR, Milano) e Giuseppe ZERBI (Linco, Politecnico di Milano)

12.55 Discussion

Friday, 9 April

Second session: *Circular Economy and Recyclable Plastics*

Chair: Giancarlo GALLI

9.00 Roberto ZOBOLI (Università Cattolica del Sacro Cuore, Milano): *Circular economy*

9.25 Anthony RYAN (University of Sheffield & of The Grantham Centre for Sustainable Futures): *What does sustainable mean in the context of plastics?*

9.50 Michele LAUS (Università del Piemonte Orientale, Alessandria): *Polymer recycling by depolymerization*

10.15 Discussion

Chair: Sergio CARRÀ (Linco)

10.30 Massimo COVEZZI (Federchimica - PlasticsEurope Italia, Milano): *Circular economy: a new challenge for plastics*

10.55 Alexandra Romina ALBUNIA (Innovation and Technology- Borealis, Linz): *Circular economy solutions: discovering new opportunities for sustained growth*

11.20 Antonio PROTOPAPA (CoRePla, Milano): *The new challenges in recycling of plastics packaging*

11.45 Michael NORTON (Environment Programme Director for the EASAC, Halle): *Plastics & circular economy*

12.10 Discussion

12.25 Gaetano GUERRA (Linco, Università di Salerno): Concluding remarks

In collaboration with Società Chimica Italiana (SCI), Associazione Italiana di Scienza e Tecnologia delle Macromolecole (AIM), Dipartimento di Scienze Chimiche dell'Università di Napoli, Consorzio Nazionale per la Raccolta il Riciclo e il Recupero degli imballaggi in plastica (CoRePla), Plastics Europe Federchimica, The European Academies Science Advisory Council (EASAC)

ROMA - PALAZZO CORSINI - VIA DELLA LUNGARA, 10

Segreteria del convegno: piemontese@lincoi.it

I lavori si svolgeranno in videoconferenza ZOOM e potranno essere seguiti dal pubblico in streaming. Il link sarà disponibile sul sito dei Lincoi la mattina del convegno. Quanti, durante i lavori, intendano intervenire alla discussione potranno inviare le domande con una email alla Segreteria del convegno, che le trasmetterà ai relatori.

Con preghiera di segnalare l'eventuale partecipazione
